

## Chapter 3

### Born Again Americans reform Sidley swine flu fraud Trident hedge – Selling vaccine liability – Buying dead Navy insurance

(Earlier character development, see [http://captainsherlock.com/Chapter\\_25.html](http://captainsherlock.com/Chapter_25.html) )

Hamish and Jam in well-fingered drag execute AMALGAM Trident to deal with Sidley multi-strain swine flu outbreak that has killed at least 60 people in Mexico and infected seven people in the United States with a mix of an avian strain, two swine strains and a human strain. Mix is with influenza strains from European and Asian swine, but not from North American swine. Hamish thinks Sidley Austin law firm is 'hedging' client investments by selling liability insurance to avian-swine-human flu vaccine developers at Ottawa's Lansdowne Technologies and buying reinsurance on the lives of Mexican victims of a bogus vaccine. Intel from Entrust indicates Sidley hedge fund spreading H1N1 influenza A virus through Sodexo, French military and civilian foodservice company and the San Diego-based Naval Health Research Center (NHRC) to cause thousands of deaths of pre-insured victims in recruit centers for Army, Navy, Air Force, Marine Corps and Coast Guard, 20 large-deck U.S. Navy ships, among deployed populations and along the U.S./Mexico border. Chips receives last minute Clipper from Homi and Uncle Ray indicating Obama will trigger Pandemic before the 5 o'clock news in NYC on 26 April, 2009 to pre-empt "MayDay" filing thought to be scheduled for 1 May, 2009. Evil team not too bright, the filing was done on 24 April, 2009 in Fargo.

As Chips was double dribbling before the rimshot at the buzzer Jam reacted to a strange vibration.

"Chips, I've never felt this type of a vibe before, not even when the Bells do their song 'Stay Awhile', but at age 57 I really enjoy it, I hope LaVaughan and the Vibrators are asked for an encore".

As our man Chips reached for a tin of smoked oysters he responded "And I hope I am also asked for an encore, but perchance I should answer my 'immediate clipper' which is overriding my electronic 'no knocking when boat's a rockin' feature'."

"Chips, Foggy Dew, Lengthy Portion, secure".

Spanner had to speak quietly and efficiently as he was in the parking lot of the Fresno Secret Service Office with Betty Crocker. "Chips, I hate to override your privacy filter but I have something we need to react to yesterday, and it's going live within 24 hours. I was at Cal Tech's chemistry lab with Nano's friend in Chemistry and we broke down the virus. It is a composite of N5H1 and H1N1 and we have traced it to a fellow formerly at Plum Island. He now works in the state that you last stopped for gas in the Presidential Limo. After isolating the two strains of flu, it is a perfect match for our head's up from Homi regarding the chemical attacks of TOPOFF 2. I suggest we go public with AMALGAM Trident and then execute Broken Cup or TREC PHUC depending on support or obstacles at the Attorney General's office. Suggest further that WE FIVE have a secure clipper in 30 minutes or less and that we determine the Abel Danger response to the Sidley SOWS and the Entrust Entrails. Are you jammin' at the Foggy Dew?"

"Not exactly Spanner. Give me 15 minutes to finish this Jam session and standby for an Immediate WE FIVE in 30 from my hack...hack". As Chips rolled in for round two, the synchronicity was achieved immediately and the Jam session reached a mutually successful conclusion right on time. As Jam excused herself for a few minutes Chips dialed in Amelia, Hamish, Nano and Skymaster and placed Fish and Rico 'on five'. Chips texted the other 4 with a brief message of 'immediate' priority. "Clipper conference on next hour, straight up, do not respond, do not fail to be available, Chips".

As Jam rejoined Chips already to return to the Foggy Dew she dialed Stone's private cel ending in 4663. "Stone, Foggy Dew, unsecure line, go ahead".

"Stone, tell your father that there is to be a WE FIVE in 13 minutes. I will be right over from the Best Western, order me a black and tan".

"Sure thing Jam, and I will order my dad a Captain Sherlock, I have an idea he will be arriving almost at the same time, if I know my Dad".

"I can neither confirm nor deny the likelihood of that possibility, see you in 5 minutes".

As Jam noticed Chips was ready to return to the Foggy Dew she saw the concerned look on his face and yet an expression of resolve. "We the people need to go up-tempo with

the Shadow Government to knock them off their timing. Speaking of timing, when we get to the lobby, you go straight to the Foggy Dew and I will delay 2 minutes and join you there so the dot connectors don't connect all the dots on the MCR. Oh, and please order me a Captain Sherlock".

"You and your son think a lot alike Chips and I will order it but what exactly is a Captain Sherlock?"

"Three ounces of Russian Standard, three ounces of Absolut, a teaspoon of Famous Grouse, and a teaspoon of Dry Vermouth, preferably Martini Rossi, stirred, not shaken, and ice cubes to the top."

As they exited the non-Otis elevator they wondered if the Sidley Women had SMACsonic mods on all the Canadian elevators also like they had on the reinsured elevators at WT1, WT2 and WT7 on 9-11. Jam left the lobby at 49 and Chips gave her a 2 minute head start leaving at 51.

As Jam joined the Abel Danger group at the table, Buck Naked and the Skinny Dippers were just starting 'Fox on the Run' as Chips walked through the doors on the southeast corner of the Foggy Dew.

"She ran through the woods leading down to the river, her hair all aglow in the hot morning sun".

As Chips sat down and took a pull on his industrial strength martini he got the attention of Hamish, Nano and Skymaster and said that they would all need to join him in the Yukon XL parked in the employee lot behind the Foggy Dew kitchen. He directed the three to all go different directions to arrive at the meeting spot and that he and Jam would be there in 3 minutes. As Nano, Hamish and Skymaster waited by the sport utility vehicle they saw Jam climbing out the ladies room window while Chips came down the steel fire escape from the overflow lounge on the second floor. They noticed Jam had a skin diving knife attached to her lower left leg. They saw a bulge under Chips' left clavicle. Jam saw the other bulge.

As they walked up to the RCMP Yukon XL Chips hit the remote unlock and the parking lights flashed and the interior lights came on as the four doors all were unlocked electronically. Hamish and Nano sat up front while Jam took the left rear, Skymaster the right rear and Chips took the hump. In WWII Chips' father had been a Hump Pilot and something about the word Hump made Chips happy.

[http://nghoi.com/images/affiliates\\_cbihpa.jpg](http://nghoi.com/images/affiliates_cbihpa.jpg)

As the five settled and waited, the LED clock on the dashboard indicated the call should be coming very soon. Exactly on the hour the Clippers went off and Nano spliced his Clipper into the Sirius radio in the Yukon XL. "Amelia with an immediate, Spanner's on in California, check in for the Foggy Dew four please".

"Hamish"

"Nano"

"Skymaster"

"Chips"

As Jam fought the feeling of being a B-FLIC [ ballsy fisherman lady in charge ] she observed the protocol and listened to what was developing.

"From Home Plate in Crownsville, Maryland a troubling report from Spanner in Fresno. The Professor's chemistry friends have IDed the virus and it is a combination of N5H1 and H1N1. While both of these strains have occurred in nature, having both in one mixture indicates human intervention. Further the chemist at Cal Tech says he believes this is not the final mix, his friends at Plum Island are concerned about a missing vial of 1906 flu that has not been located. Mr. Chemistry further states that the Swine strain is a mixture of Chinese and French swine strains and he is researching with his contacts globally to see if any of them have ever heard of an avian, a human and two different strains of swine flu occurring naturally. In a nutshell, he thinks this is the 'triple-mix' flu

which is intended to be spread during AMALGAM Trident through chicken carcasses, aerial applications and seemingly dud Chinese pyrotechnics to be deployed on major west coast cities from San Diego to Vancouver. There is enough specific and credible evidence now to roll out Broken Cup and TREC PHUC simultaneously to prevent the SOWS from initiating Trident. Nano, please respond".

Nano took the mic from the mic holder [ not Eric Holder ] and said in a sober monotone "This seems to be of human origin for certain. Your brother had dealings with Plum Island ARC in 2002 regarding natural disease resistance in certain prepotent cattle breeds. Plum Island caved into the pharmaceuticals as what was started in England in 2002 is currently slated to be deploy in 'Trident'. We in the scientific community believe the only defense is to identify the 8 major players in the Sidley SOWS and do it in a public, transparent and timely fashion. After publishing the Truth to the citizens, an immediate follow up to the US Department of Justice must occur. Suggest a new cover page for Civil Case 3:07-cv-49 for immediate delivery to Obama's cabinet to determine if Pelosi-Obama-Leahy-Holder are willing to do what Mukasey-Leahy-Conyers et. al. could not get done in the last 8 years. My gut feeling is there is no difference in the integrity of the players and, hope I am wrong, but I do not expect that Holder will respond responsibly. More likely a Robert Wone response may be forthcoming from the perverts out east."

<http://www.bornagainamerican.org>

"Amelia, if you don't mind I think that while the Mexicans are used as human guinea pigs Reform Canada and Born Again Americans may consider deployment of Rolling Thunder Reform as 340 million North Americans demand that public servants honor their oath, or vacate their office. In my native England in 1685 there was a Pitchfork Rebellion as the people labored to overthrow an unpopular "papist king". We see the same thing in America now as Obama's ratings are lower than W's were and the Barney Franks and Jamie Gorelicks are not being held accountable for the gutting of America. And worthless and corrupt public servants like Bobby the Eel are given golden parachutes by Corporations involved with the flying machines of 9/11 such as Canadair's CL604 which was the on scene commander aircraft for UA93, UA175 and AA11. You Americans really need to support Boeing and expunge your airspace of Bombardier and Embraer small jets that can get around RICO again just as they did on 9/11. And the Chinese wing boxes of the Boeing 787 are a huge security risk that cannot be introduced into the US aviation system. I understand Delta is going to cancel the 787s ordered by a merger partner. As the Truth of Boeing's Uninterruptible Auto Pilot, Rose Law's QRS11, France's SMACsonic insulation and Entrust's True Pass become understood by "we the people" the 8 femmes of the Sidley SOWS need to be facing treason charges under USC § 2382. Misprision of treason. And if Attorney General Holder will not accept the Qui Tam offering on MayDay, he can become defendant # 9 along with the 8 women."

"Understood Nano and Hamish, Little Brother your thoughts?"

"Suggest you join us publicly in our suing of the SOWS. Skymaster and Jam will be launching at midnight in the 02-K to fly over the rendezvous of S4, the Queen of the

North, and the mothership. Diehard, Sluggo, Vani and Deli will take Madame Screu-Fait to Gravedigger's freezer for a quick sniff of some feet that have washed up in the last 2 years. Screu-Fait has been modified with the AQFB27M nose job which will translate her sense of smell and her heart rate into a lucid message on our LED monitors. We need to get headed in the right direction from the Point Last Seen. We Five will now return to the Foggy Dew and brief the big team....".

"We Five? There are only supposed to be four plus myself and Spanner on this call."

"The B-FLIC fisherman is with us as a laid write-in, B-FLIC is crucial to the maritime portion of TREC PHUC."

"Chips, I think you meant 'late write-in not laid write-in', try to get your mind on your mission."

"Thanks for that timely correction Sis, and you try to decide whether to swim with the Sherlocks or sink with the SOWS. Time is short, shorter than you know. We are going live at midnight, monitor company '2'."

As Chips finished speaking the 6 green LEDs on his Clipper went yellow to indicate standby for routine or priority messages. At the Rams Head Amelia signaled Chrissy to bring her another double martini as she wrestled with her conscience. As the "5 membered party of 4" rejoined the Abel Danger regulars, Buck Naked was just starting Dwight Yoakum's "I Ain't That Lonely Yet" with "...once there was this spider in my bed, I got caught up in her web....."

Jam mentioned to Chips that she particularly liked the metaphor. Chips started thinking about phor-play. "Jam, your midnight flight should be completed by 0200, is that correct?" Jam was reading his mind and knew where his head was at.

"That is correct Chips and I feel like a fish out of water in an airplane so if I seem nervous during the debriefing, foot stomper, debriefing please think of something to calm me down".

"We have a winner" blurted Chips as a sideways look and a grunt from Diehard signaled it was time to go. As the deploying players stood up to leave, a routine Clipper was taken by all. Homi was calling in from his DHL van across the street from the Foggy Dew, his text read : three Crown Vics just pulled up to the Foggy Dew, execute option "Joe Cocker". As Jam, Skymaster Vani and Deli headed for the bathroom windows, Diehard and Sluggo went to the front door of the Foggy Dew as Homi and Duke walked over to support. As Diehard smiled to reveal his steel teeth, Duke snarled to reveal his incisors while Homi tapped his left clavicle and Sluggo slammed a fist into the street. The Crown Vic trio got the message loud and clear, 'hit the road'.

As the three unmarked Fords headed for a Tim Horton's Donut Shop, a 1995 Fleetwood Limo and a matching hearse from Gravedigger's funeral home arrived to transport two to

the airport, and 4 to the marina. As the long black vehicles slithered away from the curb Jam's private cell phone ending in 812 took a routine from Chips "Midnight at the Oasis".

"Afternoon Delight" she responded.

"Both" was the last transmission.

By 2330 the 4 boaters and the 2 flyers were in their 'rides' awaiting the launch signal. Skymaster had done a walk around and in fact had started both engines and idled them to get some CHT registered so that when the 'launch' signal arrived, he could take off immediately. He and Jam were both surprised and pleased to have been joined by an RCMP 'listener' assigned by Gadget Bent. Madam Screu Fait had made a potty stop in some greenspace before boarding the "Lutefisk II" a 57 foot trawler crewed by Olaf Anderson. As Olaf called for the mooring lines to be hauled in and Skymaster had Jam kick out the chocks in a very B-FLIC like manner, all clippers went off with a two word instruction from Chips "Launch 'em". Immediately following the launch order, all Abel Danger Clippers took a printed message from Dwarf who had left the Battle of the Bands a little early to take over the watch from Sluggo in the DHL van modified for Homi and Duke. The message was compilation of Intel harvested from two-way Entrust intercepts in hours between 1800 to 2400.

“First Lady Entrust to CDC 4-24-09: VNN spin American citizens on updated Sidley SOW Swine Strategy. Use unprecedented multi-strain swine flu outbreak. Distract from French and Chinese input, just like 9-11. Tell 'David Dangle' to spread fear antecedent to the upcoming intentional deployment of the Sidley Triple Mix Toxic Flu which will have Avian-Human-Swine strains triple mixed. Inject in market chickens, aerial applications from Canadian CL604 tail cones and 'dud' Chinese pyrotechnics at major population centers on the west coast.”

“Abel Danger Entrust to CS 4-24-09: Sidley hedge fund spreading H1N1 influenza A virus through Sodexho, French military and civilian foodservice company based in Marseille, and the San Diego-based Naval Health Research Center (NHRC). Sidley is using Entrust TruePass digital identities to embed bio-weapons agents inside the Sodexho food chain. Virus in food chain to cause thousands of deaths of pre-insured victims in

recruit centers for Army, Navy, Air Force, Marine Corps and Coast Guard, 20 large-deck U.S. Navy ships, among deployed populations and along the U.S./Mexico border.”

“First Lady Entrust to CDC 4-24-09: VNN spin from CDC promulgate myth 4 strain mix from Europe and Asia, but not from North America Lansdowne or Plum Island”

“Abel Danger Entrust to CS 4-24-09: Rollout 'Felipe Solis-Barry Soetoro' imminent.”

“Abel Danger Entrust to HW 4-24-09: H5N1 vaccine mix by depopulationist Maurice Strong and his protégé Paul Martin. Sidley has sold liability insurance for "private manufacturer of domestically produced" vaccine once pandemic is underway with Sidley program allies through AVDP (Allied Vaccine Development Project) and Sodexo in NHRC. Sidley vaccine systems and related medical countermeasures will protect LGBT Forces against political chemical and biological warfare threats from white males. Agents in UN health arm, the World Health Organization (WHO) has Con Air planes loaded with bio weapons to wipe out heteropatriarchs in US Navy. Check spin by WHO spokesman Thomas Abraham "We are very, very concerned. We have what appears to be a novel virus and it has spread from human to human ... It's all hands on deck at the moment." [http://www.blackherbals.com/pandemic\\_vaccine\\_in\\_hands\\_of\\_dep.htm](http://www.blackherbals.com/pandemic_vaccine_in_hands_of_dep.htm).

As Chips had the luxury of time on his hands and a laptop on his desk in Suite 1002, where he had 'moved in' in the interest of security he generated and promulgated the following message for all Abel Danger assets worldwide:

“Abel Danger Entrust to HW et al www 4-24-09: Mobilize Reform Canada, Reform Rolling Thunder and Born Again America. Sidley hedging Lansdowne vaccine, Mexican swine flu by selling liability insurance to avian-swine-human flu vaccine developers at Ottawa’s Lansdowne Technologies and buying reinsurance on the lives of Mexican victims of a bogus vaccine. Entrust encryption conceals identities of client investors such as David Emerson with the CAI private equity group in Vancouver. Ergo Chips to share 8 names with Attorney General Eric Holder on or before May Day to head off a false flag conference slated for 2 May, 2009 in Texas and Sidley use of Entrust to conceal hedge fund frauds in “Allied Vaccine Development Project’. Civil Case 3:07-cv-49 'Hawks CAFE v. Global Guardians' will be amended to Hawks CAFE v. Women@Sidley <http://www.hawkscafe.com/107.html>”

Amended defendant list will be reduced to:

Bernardine Dohrn (and the wo-man behind the mask)  
Michelle LaVaughan Robinson Soetoro  
Janet Reno  
Jamie Gorelick  
Leah Zell Wanger  
Hillary Clinton  
Bruce McConnell  
David Emerson

Paul Martin\*  
Maurice Strong\*  
unnamed Jane Doe\*

\*suggested alternates

To be known collectively as the Octopussies and note how much more refined this 5 word search [google danny casolaro + chips + octopus + grolsch ] is over the 4 word search [google danny casolaro + chips + octopus ] without Grolsch.

As Chips read and re-read his own message he realized that by purposely inputting the incorrect time or date he would cause confusion for the ether headed folks who would wish ill-will on the citizens of America just like the Greg Dyke inspired BBC had a little time issue with their live report of the collapse of WTC 7 a full twenty minutes ahead of the real [ pulled ] collapse. Noting that the 02-K was airborne and flying top cover for the Lutefisk II Chips enabled the mission monitors on both vessels.

Listening first to the cockpit monitor of the 02-K Chips was surprised to hear 'Gadget Bent' had flown out with Skymaster and Jam. He followed the cockpit dialogue as Jam deployed the trailing antenna and Gadget used the hand held night vision camera to magnify and search the surface of the water below the Skymaster. Over the target coordinate set his camera picked up the wake of a periscope made more clear by the luminescence of the salt water being disturbed as the periscope searched the surface for the Lutefisk II. "Mark" said Gadget and Skymaster push "freeze insert" button to capture the latitude and longitude of the periscope. Knowing from the briefing guide the course and speed of the S4 Skymaster could predict future positions by simple math. Following the 'mark' he reversed course and Jam triangulated the position of the Lutefisk II and the Storm Scope on the right wing of the 02-K also had a contact at that azimuth. Skymaster over flew Lutefisk II and reversed course a second time while in a slow speed descending turn. As he over flew Lutefisk II at 200 feet AGL he turned on his nav lights and strobe and transmitted "nose, 3 miles" on company 2. The skipper of the Lutefisk II increased power to rendezvous with the S-4. As the two vessels docked with each other, Deli, Vani, Diehard and Madame Screut Fait boarded the S4 and met Jam's friend from Fort Myers for the first time. Once all were aboard the Sub turned towards [redacted] and the Lutefisk II dropped anchor. The 02-K then slowed to saunter hold as all Abel Danger Clippers lit up with a Flash Priority Message.

"Amelia to all players, initiate AMALGAM Trident TREC PHUC, the evil ones took the bait and they will announce a bogus flu emergency prior to the 5 o'clock news in NYC on Sunday, 4-26. Homi, Hamish and Jam's maritime friend indicate the 2012 target date for TOPOFF 2 is now moved to a time prior to Congressional elections of 2010. Expect to have millions of Mexican immigrants moved into former Red states immediately ostensibly to protect them from drug cartels and swine flu. Real purpose is to enable Blue takeover of Red states. No responses necessary, initiate AMALGAM Trident TREC PHUC immediately, Jackson and Moose authorized 'red-line', capeche?"

Those who didn't recognize AGTR 5 on 8 June, 1967 may not recognize TREC PHUC now.  
Fight's on.
