Skymaster noted 'Maestro' had selected Union Bay for surface portion of AMALGAM Trident, TREC PHUC. Waylon uncaged laser, put the crosshairs on a rogue sub and 'locked'. Queen Hornet messaged that while she was at DOJ, Sidley Women had ordered Ms. Robinson and Barry Soetoro (an Indonesian citizen on Fulbright Scholarship at Occidental college 1979, 1980, 1981) to take Mau Mau oath. QH gave a red alert to Chips. "You must disrupt" Mau Mau death squads which are moving through ICAO network to bomb Vancouver 2010 Olympics. S-2 ordered immediate attack as needed on

code word 'Armour Mau Mau'. Next clipper warned that Sidley Swinehood – Sidley Women Immigration and Naturalization Entrust – is killing investigations into hits such as Air India 182; cult members trick law enforcement officers into attending oath taking ceremonies and witnessing Mau Mau rituals, including dismembering bodies. Confirms QH “Must disrupt; Mau Mau in B.C., Chicago and Washington readying huge hit at multiple Olympic sites in 2010”. More messages “Emerson set up federal charity Piggy Palace Good Times Society on pig farm to register Mau Mau oath; killers travel through Emerson’s YVR on ePassports i.e. ICAO Machine Readable Travel Documents. First Lady Swinehood bosses had hundreds of Mau Mau sleepers waiting for a call to join Amec at 9/11 sites; has thousands of MindBox controlled zombies for Vancouver 2010 Olympics. Alert sheep of threat from swine and goats. Chips ordered GBU-43K detonated; blew water out of Union Bay. RCMP takes bodies out of the Rogue. Four morts. Plan B in regards to May 12 election to disrupt Emerson plans for Winter Olympics. Billy Ocean mixes cocktails. Chips splits forces – one group for Grand Jury Fargo 9/11, the other for B.C. MindBox and Mau Mau pig farm. Gunfire erupts. Homi and Sluggo assume defensive postures while Harley riders blew out some carbon in the parking lot of ‘Big Bad Johns’.

.....

As the three person crew in the 02-K loitered just east of the Lutefisk II, an almost inaudible whisper came across Company Clipper 2 at exactly the prescribed hour "Target Bay Bravo". Looking to his right, Skymaster saw a confident Jam pointing left over her left shoulder as Gadget Bent leaned forward to listen over the noise of the centerline engines on either end of the STOL modified Cessna. With her left hand Jam entered the latitude and longitude of the Target Bay and on his control wheel display Skymaster saw that the 'Maestro' had selected Union Bay for the surface portion of AMALGAM Trident, TREC PHUC.

As the 02-K was turned left 120 degrees to saunter to the west-north-west, Jam spoke over the engine noise "from the Maestro comes word that option Bravo was selected for issues relating to time, tide and formation and to a lesser degree because it appears that some unwanted guests were hanging around Option A." As Skymaster referred to his Briefing Guide provided by the 'Maestro' he confirmed that Union Bay would be the shallow bay which would be utilized to take out the 'rogue sub' that had been spotted trailing S-4 just out of lethal range.

Gadget Bent leaned forward and confirmed the presence of unwanted guests at White Rock, which was the preferred shallow water bay, "RCMP intel indicates several Mau Mau scout groups are loitering along the waterfront of White Rock. For this reason and also considering Union Bay is further from the 49th parallel, RCMP intel agreed with the 'Maestro' that Target Bay Bravo provided the best option for TREC PHUC."

As Skymaster guided the 02-K towards the Lutefisk II he set a course direct to PBD02 and turned on all external lights for Captain Olaf Anderson to be comforted by. As he overflew Lutefisk II Skymaster could see the wake of the S-4 as it was converting to a

position parallel to the Lukefisk II and offset to the starboard by 1000 meters. On her 'surface scanner' Jam saw that the 'rogue sub' was still stalking the formation of vessels including S4 and Lutefisk. As she gazed at the horizontal display three green flashes occurred simultaneously from the surface contact S-4 and from a previously unseen vessel now 1000 meters dead astern the 'rogue sub'.

"Union Bay at hack plus 30" said Skymaster over Clipper Company Guard "hack". At that point digital stop watches were hacked in the 02-K, a KC130F approaching from Whidbey Island, a B747-400 modified with a Laser Weapon orbiting overhead Union Bay, F4D 66-7478 anchored over Comox and in a Super Puma helo on 'hot 5' floating in the center of Union bay, with Hoss in the right seat and Billy Ocean in the left seat. On the surface Captains Olaf Anderson in Lutefisk II and Captain Marty Smith in the Mighty Fitz hacked their digital devices aslo. Captain Anderson was all ahead 2/3 as Marty Smith called the engine room for 'all ahead flank, and then some' as the Mighty Fitz was closing the gap between Union Bay, the 'rogue sub' and a very coordinated TREC PHUC. In Quebec Bravo 7 the KC130F was slowed to 140 knots as Fish, in the left seat, instructed Dwarf to open the ramp and door and 'ready the weapon'. As the remote skipper of the S-4 maintained a constant position of support to the starboard of Lutefisk II he could see on his depth meter that the intercoastal waterway was becoming more shallow as Captain Anderson had the channel leading into Union Bay on the nose and with speed necessary to be "inside the gates" at hack plus 30. In the S-2 dead astern the rogue sub the sonar man agreed with the skipper that the rogue was readying 2 torpedoes.

"S-2 to Buck, highlight rogue and standby for Laser if necessary, Roughrider and Tango, ready 2 Paveway IIs." Two sets of two clics indicated that both Buck and Tango were ready to play. In the modified 400 Buck called for Moose to come forward to the flight deck. As she entered Buck calmly asked, "Looks like show-time in 15 minutes or

less, please confirm with Jackson that we have a 'green range'." A knowing nod and a thumb's up from Moose was all Buck needed. Buck turned to his right and instructed Waylon to 'ready the laser on rogue and standby to illuminate'. Waylon leaned forward into his scope and uncaged the laser, put the crosshairs on Rogue and 'locked'. He then turned to the left and nodded at Buck. With only 9 minutes to go before Hack + 30 all Clippers took a Flash priority and Entrust encrypted message from Queen Hornet.

"When I was with the DOJ, Sidley Women ordered Ms. Robinson and Barry Soetoro – an Indonesian citizen on Fulbright Scholarship at Occidental college 1979, 1980, 1981 – to take Mau Mau oath. Oath takers become MindBox zombies; they span Sidley's 1984 sabotage of the Bhopal pesticide plant. Macieira-Kaufmann, now Citibank president for SBA, span Chernobyl while she was Fulbright scholar at the University of Helsinki. Kristina Nordlander, Fulbright Scholar from Harvard Law School, is spinning swine flu in EU. Sidley has issued hundreds of Emerson ePassports to Mau Mau oath takers, including Barry Soetoro, among 105,400 Fulbrighters from United States and 174,100 from other countries. Hillary is Mau Mau; she runs her girls through Bureau of Educational and Cultural Affairs of Department of State. She used Fulbright and mtvU to promote power of swine music; sent [Swine Time Katie Day Good - in Mexico](#) to spin Swine Flu and work up Mexico City frenzy for travel insurance scam. Swinehood is using Martin's CSL International in [Massachusetts](#) to build Tomoye virtual war rooms, coordinate Mau Mau hits for Sidley hedge funds. Strong genocides (Rwanda, Cambodia etc) financed by 'tontine' insurance schemes structured by Sidley Austin for David Rockefeller; CalTex boss and Strong's employer in Kenya in the '50s. Red alert – you must disrupt – Obama, CAI hedge fund and Women @ Sidley are using ePassport to move 'Mau Mau' death squads through ICAO network for bombing of Vancouver 2010 Olympics. Adopt digital identities; attack virtual targets without delay. Amelia out."

"S-2 to Buck, Rogue has armed the torpedoes; be ready to designate Rogue immediately, Tango and Roughrider, bring weapons to bear on Rogue, S turn at altitude to allow immediate attack if needed on code word 'Armour Mau Mau'." Once again two sets of two clicks indicated all players were dialed in. At 6 minutes prior to Hack + 30, an incoming Flash from Rico in Big Bad John's indicated further reason to prosecute TREC PHUC:

"From ICAO Montreal, Maurice Strong developed oaths for ePassporters from his

experience in the Identification Unit of U.N. Security Section in New York and the 'Mau Mau' ritual-killing in Kenya. Strong, Martin and Emerson issued Barry Soetoro – Fulbright alumnus, Indonesian citizen – with ICAO ePassport in name of 'Barack Hussein Obama'. They wanted to honor Hussein Onyango Obama, a former leader of Kenyan 'Mau Mau' killing cult and Soetoro's paternal grandfather. Remember Strong placed Martin as President of the CSL Group to spin sinking of U.S. *Great Lakes freighter* SS Edmund Fitzgerald – same scam with *Queen of the North* 30 years later. Sidley Swinehood – Sidley Women Immigration and Naturalization Entrust – kills investigations into hits such as Air India 182 by tricking law enforcement officers into attending oath taking ceremonies, for example the Piggy Palace raves at the pig farm in B.C. or the naval base at Esquimault. Officers unwittingly (?) witness Mau Mau oath taking and rituals, including dismembering bodies. Note feet in shoes floating along CAI hydrographic charts in custody of Emerson and al Zaibak. Strong binds his killers to a Swinehood vision of a depopulated Anglosphere with oaths and rituals which include animal sacrifice, ingestion of blood, *cannibalism*, ritual *zoophilia* with *goats* or pigs, sexual orgies and the promise to kill, dismember and burn victims.

<http://www.uoguelph.ca/~terisatu/MauMau/index.htm> Sidley women use Entrust to switch Mexican red and blue teams between killer and victim factions for tontine swine-flu insurance scams. Remember DOA (Dead on Arrival) set up in 1978 when Lillian Jean O'Dare disappeared from Downtown Eastside and Hillary got her cattle futures and Rose Law patent (GyroChip Unabomb) gig. Mau Mau oath takers violate not only Christian ethics but every tribal one as well; Mau Mau leaders deliberately reduced their victims to a state where a woman who took the Mau Mau oath was cut off 'from all hope, outside Mau Mau, in this world or the next to achieve absolute loyalty to the Swinehood. The Mau Mau forces recruits, voluntary or involuntary, to seal their oaths by digging up corpses and eating their putrefied flesh, copulating with sheep, dogs or adolescent girls, and by drinking the famed 'Kaberichia cocktail'-a mixture of semen and menstrual blood. You must disrupt Mau Mau in B.C., Chicago and Washington – they are getting ready for a huge hit at multiple Olympic sites in 2010”

http://www.traviskelly.com/Sibel_Edmonds.jpg

As Skymaster flew ahead of the 4 vessel flotilla, his weather radar discriminated the

opening to Union Bay on the nose at 5 miles. Knowing that with the messages from Queen Hornet and Rico, the mission was a 95% 'go' so he transmitted "launch Angel" and from the center of Union Bay, Hoss became airborne in the Super Puma and went to his prescribed 'Angel orbit' outside of the 'shoe box drop zone' now going hot in the KC130F, Sweet Talking Woman and Super Laser. At Hack +26 Tango armed his floating Igloo White devices just inside the channel to Union Bay. In the cargo bay of the KC130F Dwarf set the timer to Hack + 29.55 and put the drogue chute on the edge of the Hercules ramp. In the 02-K motion was detected in a duffle bag that had been loaded with 'contingency plans' and an attractive woman holding a sky diving chute joined Gadget Bent in the second row while Skymaster and Jam focused on their flying, navigation and C&C duties. Skymaster turned over his right shoulder to determine the source of the noise and thought he was seeing double as there were now two people in the back seat where he believed the RCMP man would be alone. He also noticed how "Sable" was very similar in appearance to Jam. After Sable had passed the sport chute to Jam, she pointed at the digital stop watch indicating that the Flying Circus was now at Hack + 28 as a third Clipper message came out of the Company AT&T's Clipper One:

“Strong, Martin and Emerson set up federal charity Piggy Palace Good Times Society, on pig farm to register Mau Mau oath taking by killers traveling through Emerson YVR on ePassports – ICAO Machine Readable Travel Documents. Canadian Passport Office equipped 1985 bombers of Air India 182 with first machine-readable ePassports. Martin hired Emerson in 1993 to move Mau Mau killers on ePassports through Vancouver Airport Authority to sign Piggy Palace oaths and return home on Queen Hornet’s Con Air (‘JUSTICE’). The First Lady’s Swinehood had hundreds of Mau Mau sleepers waiting for a call to join Amec at the 9/11 sites; she now has thousands of MindBox controlled zombies with ICAO ePassports ready for bombing and killing at Vancouver 2010 Olympics. Mau Mau now buzzing Liberty. You must disrupt and alert the sheep of imminent threat from swine and goats.”

As Skymaster looked at the countdown and considered the message from Maestro he transmitted on Clipper Guard "Maestro, Skymaster, confirm Green Range in 30 seconds".

Immediately responding on Clipper Guard was "Green Range, execute TREC PHUC". Skymaster looked below and saw the S-4 entering the channel with the rogue sub 500 meters in the stern. He broke a slight sweat as he saw the Lutefisk II re-illuminate after a right 90 to avoid the channel. He observed the Mighty Fitz taking a position to block the exit of the channel and could see the luminescence of the churning water as Captain Marty Smith had the engineer in all astern full as the two chained anchors were dropped. With the 'shoe box' now secure Jam transmitted "all weapons to bear on my hack..." as she watched the tick-tick of the digital sweep second hand, at 29+55 she transmitted "Dwarf, deploy" whereupon a GBU-43K was pulled out of the back of the KC130F directly overhead the Rogue sub. At Hack + 30 she transmitted "Execute".

In Laser One Waylon 'lit up' the rogue with the Laser as Tango fired two GBU-12s from the Sweet Talkin' Woman while Roughrider had the F4 screaming earthward from 25 thousand feet at mach 1.4 with the cross hairs centered on the Rogue. In the back of the F4 Tango detonated the Igloo White floaters which had been modified with SMACsonic similar to that placed in the jets of 9/11.

As Skymaster turned away from the Rogue to gain separation from the explosion he triggered the para-flares he and Jam had deployed as well as the para-flares that had been seeded by Fish and Dwarf in the KC130. In a visual display unrivaled in history the GBU-43K detonated at 10 feet above the surface and the man made GPS guided 'earthquake' blew much of the water out of Union Bay and the heat from the explosion evaporated most of what remained. As the two layers of para-flares illuminated the area the Mighty Fitz trained powerful search lights on the S-4 and Rogue as they rested on the sand that one minute before had been the bottom of Union Bay. As Moose leaned forward and gave Buck a fraternal pat on the back, Jam was opening the right door of the 02-K as Hoss signaled "Angel on station, lights bright". Skymaster gained a visual on the Super Puma and flew directly under the helo at 100 feet above the intercoastal waterway. Jam pushed off from the right side of the 02-K as Sable and Gadget held the door open against the 60K rush of air as Skymaster had the aircraft as slow as he deemed prudent for idle, over water at night. As Gadget closed the right door and locked it, Skymaster went to climb power and put Navy Whidbey on the nose.

Jam had used just a drag chute to slow her forward motion and descent into the water. The strobe on her right shoulder was activated on water entry. Billy Ocean opened the left door of the Puma as Hoss set the helo on the water 30 feet downwind of Jam. As Billy Ocean threw the grounding lanyard into the still water, Jam sidestroked to the Puma where she grabbed Billy Ocean's outstretched right hand as he pulled her aboard. Once inside the chopper Billy closed and locked the left door as Hoss lifted off and set a course direct to the Mighty Fitz to hoist Captain Marty Smith aboard. Five minutes later the Super Puma was enroute to CYVR where a long black limousine waited and a tall 26 year older driver was ensuring the Grolsch was at precisely 34 degrees Fahrenheit.

Enroute to Whidbey Skymaster transmitted: "Flying Circus, any assets not Code One please so indicate". No response. As Buck turned to recover at McChord AFB, Fish headed for Whidbey as did Skymaster." From the Laser One Moose transmitted "Excellent work Smokers, Jackson reports that RCMP On Scene Commander has taken the bodies out of the Rogue. Four mort. Mau Mau." That brief message meant a lot to Chips and Jam and their flying and floating circus team members as they had committed themselves to protecting America and mitigating the deleterious effects of the Clinton Administration and specifically Gen. John Shalikashvili who endeavored to give the Red Chinese all of America's military secrets.

Following the status report from Moose, Maestro transmitted: "Debriefing at Big Bad John's for all players ASAP. Hoss will recover Whidbey aircrews and Buck and Waylon will join Moose in Alaska One as that ANG B26 "Spirit of Sperry" brings them up to CYVR for the debriefing and pre-deployment briefing to take place for Billy Ocean, Jam, QB and Chips as they will be dispatched to Global Headquarters at 0200 straight up." Hoss heard that transmission just as he was going into a hover next to the 1995

Presidential Limo waiting near the service vehicle gate of the Vancouver International airport. Due to having no "Emerson Entrust Security Bypass" Stone had parked just outside the gate and had an illuminated windsock on top of the Limo. As Hoss observed the limpness of the windsock he thought about the husbands stuck with Thunder Thighs, Sasquatch and Gorilla Woman. Stone held one of Jam's hands as she and Billy Ocean stepped off the port pontoon of the Super Puma and moved quickly to the idling Fleetwood stretch. As Jam, Captain Marty Smith and Billy Ocean settled into the dark party pit of the Limo Chips offered them a choice of adult beverages. Jam ordered a 'Caribbean Queen', Billy Ocean joined Chips in having a frosty Grolsch wide body while up front Stone drove expeditiously to Big Bad John's located near Canada's Esquimalt naval base on Victoria Island. After stroking his seagoing beard, Marty asked for a 'Billy Club' and added "please make it a double". Stone hoisted a 'Captain Sherlock, shaken not stirred' as he drove expeditiously to get the crewmembers to the debriefing at Big Bad John's.

<http://www.strathconahotel.com/big%20bad%20johns%20Gerry.jpg>

Billy Ocean opened the fully stocked bar in the back of the Presidential Limousine and created a Caribbean Queen for Jam while he enjoyed the fresh taste of a Grolsch wide body. As Billy mixed his original signature concoction he reminded Chips, Jam, Stone and Captain Marty Smith what a pleasure it was for him to be a contributing member of the 'Flying Circus' that labored to ensure the perpetrators of 9/11 were brought to justice and that the second installment of TOPOFF scheduled to be deployed during the 2010 Winter Olympics in Vancouver would be cancelled when the same perps were listed and those names shared with USDOJ and RCMP. Billy Ocean had made a strong pitch that as a master of disguise who could pass himself off as BHO, would allow him to travel in advance of Chips and Jam and gain gigs as bartender in watering holes where Chips and Jam, posing as mid-life newlyweds, would gain intel from bad people who would have had their brains paralyzed and their lips loosened by the 200+ original cocktails in Billy Oceans' liquid repertoire. As the consultant bartender at "Big Bad John's", Billy had gained an ePassport from a MDA executive who fell victim to a triple dose of 'Billy Clubs'; a unique concoction where 2 shots of Johnny Walker, 2 shots of Jack Daniels, and 2 shots of Jose Cuervo were topped off with coke and ice. This same loose-lipped MDA

exec had bragged about the Kaberichia cocktail consumed during a Mau Mau initiation, and how the brotherhood had added a White House Swinehood to its list of ill-gotten booty.

Chips had been encouraged to work with Billy once he learned that Billy had developed some subtle hand gestures to ensure that Chips could tell the difference between BO and BHO even if they were dressed alike. Billy, who was very musical and played many instruments, had many subtle hand gestures that would allow Chips to determine who was who. The most useful was his patented 'shaken stir' which would be utilized if Chips was ordering a Captain Sherlock. Other discreet signals could be delivered in the selection of garnishes added to his original signature cocktails including the Caribbean Queen, Billy Club or the industrial strength 'Big Bad John'. It was also Billy who had suggested putting microchips in the 'Kaberichia cocktails' consumed at the Mau Mau initiations so that once weak minded and evil people sold their souls they could be positively IDed by bar code readers in Billy's blender, Chips' pinky ring, or Jam's tackle box. Whether in a bar, on a walk or in a fishing boat the Circus would be able to ID the bad guys.

As Hoss hustled over to Ault Field to pick up Sable, Gadget, Skymaster, Fish and Dwarf, Buck and Waylon followed Moose into the idling A26 Invader that had been restored completely in honor of L/C Sperry who had died on Mt. Baldy in 1948 while serving at Gore Hill Airport, in Great Falls, Montana.

With the collector stacks of the A26 turning cherry red on takeoff roll, Hoss shuttled back to Big Bad John's while at the bar's aft right corner Rico, Marquis d'Cartier and Sluggo awaited the arrival of the flyers and floaters. As Hoss overflew a red buoy just outside Vancouver tower's airspace he saw the S-2 sub tied up to a buoy and went into a hover to retrieve Quebec Bravo and his crew to join the debriefing. It was just before midnight when the last member's of the circus came into the right rear corner. Outside, Homi, Diehard and Duke provided a protective ring of security while dialed into Sluggo at the head table. At Geiger Field in Spokane, Caffrey finished up her preflight of "Never Miss" after taking on a full load of fuel plus a pair of drop tanks to enable a non-stop to Hector International Airport, KFAR.

Rico and Hamish called the meeting to order at 2245 as the last players had entered the bar. Hamish introduced Rico to the new players and after drink orders were taken by a curvaceous blond with a 2011 Georgetown ring Rico took the floor. "We have just 3 days until the elections in British Columbia and just seven months until the 2010 Winter Olympics. Voters in White Rock/Surrey riding have indicated a desire to reinstate the Grand Jury remedy to judicial corruption; a mode similar to the voters in America's heartland which stretches from Fargo south to Brownsville, Texas. Don't mess with Texas. Before I turn the mic over to Hamish I wish to let you all know that at the end of this gathering Jam, Chips, Billy Ocean will be departing for Global Headquarters to meet tomorrow with Queen Hornet who has now broken away from the SOWS of Sidley. Spanner will also be in attendance at Global after a quick stop to review evidence with Nano at Cal Tech. Now we will get a quick debriefing from Hamish as I see he has concluded his phone conference with Gadget from RCMP, Hamish, over to you".

"To the flyers and floaters of Sherlock's Global Intel it is my pleasure to report that RCMP has indeed found 4 morts in the Rogue sub and all were Mau Mau. But of more immediate significance is that on the floor of the recently vacated Union Bay Mounties discovered another 11 feet still in tennis shoes. In each case the second toe was found to have an MDA microchip implanted under the toenail. Nano and the Mounties have agreed in principle what the purpose and capability of the MDA chips are; they will be reporting via priority Clipper calls within 12 hours. It is imperative now to dispatch Chips, Jam and Billy Ocean to the Hotel Donaldson in Fargo there to meet with Queen Hornet and some yet to be determined players from FBI and USDOJ including Wrigley Field. The Director of the FBI has not indicated his willingness to attend but one of the other 'top five' at FBI will be there in the absence of the Director. While the Fargo contingent at Global considers a Citizen's Grand Jury action in the event AG Eric Holder does not reply responsibly to the 4/29/09 'Easter Egg for Eric', Rico, Marquis d'Cartier, myself, Gadget Bent and some other responsible Canadians will redouble our efforts in regards to the May 12 Election hoping to forestall any AMEC power display of force during the Winter Olympics of 2010. Sidley Austin let 89 of their attorneys go recently and there are now are at least 3 such laid off attorneys that the SOWS will wish were still on the S-A payroll. Please now mingle amongst friends while last minute details are nailed down regarding Team Canada and Team USA; both teams being loyal members of the Born Again North Americans. <http://www.youtube.com/watch?v=vBZSBGHm0RY> (a song dedicated to Americans who have lost jobs or homes to Emerson's MindBox)

Rico and Hamish mingled with Jam, Billy Ocean, Chips and Quebec Bravo as Hoss and Stone sat at the corner of the table discussing the successful mission recently completed. "Hoss, after all that flying I bet you'd like a great big brewski, let me get you a killer" offered Stone.

Hoss thanked him but said no, "The plans have changed and I will be flying an AC46K back to Fargo with your dad's group, we have to leave fairly soon as we have a rendezvous with Caffrey over Spokane at 0230. Dad's decided to split forces – one group to start Grand Jury for 'Fargo 9/11', the other to start Grand Jury for 'MindBox

and the Mau Mau pig farm'. Any chance you can run the group back out to Vancouver?"

"No problem Hoss, let me call ahead and have SWAN-E get the AC46K preflighted for you. Do you know if it's refueled?" asked Stone.

"It should be full but if not tell SWAN-E to pump until fuel squirts out the wings, the Fargo weather forecast is not very pleasant. We are committed to a Fargo landing as Caffrey needs to be on the ground by mid morning latest to resume her duties with the airline, capeche?" Hoss finished his statement to what sounded like a brief eruption of gunfire. As Homi and Sluggo assumed defensive postures it was determined that some well oiled Harley riders had blown out some carbon in the parking lot of Big Bad Johns'.
